1587 FC/1587/1577
Insulation Multimeter

Safety Information

Go to www.fluke.com to register your Product and find more information.

A Warning identifies conditions and procedures that are dangerous to the user.

⚠️⚠️ Warnings
To prevent possible electrical shock, fire, or personal injury:
- Read all safety information before you use the Product.
- Examine the case before you use the Product. Look for cracks or missing plastic. Carefully look at the insulation around the terminals.
- Do not use test leads if they are damaged. Examine the test leads for damaged insulation and measure a known voltage.
- Do not use the Meter around explosive gas, vapor, or in damp or wet environments.
- Do not touch voltages >30 V ac rms, 42 V ac peak, or 60 V dc.
- Only use probes, test leads, and accessories that have the same measurement category, voltage, and amperage ratings as the Product.
- Keep fingers behind the finger guards on the probes.
- Do not exceed the Measurement Category (CAT) rating of the lowest rated individual component of a Product, probe, or accessory.
• Use the Product only as specified, or the protection supplied by the Product can be compromised.

• Comply with local and national safety codes. Use personal protective equipment (approved rubber gloves, face protection, and flame-resistant clothes) to prevent shock and arc blast injury where hazardous live conductors are exposed.

• Do not work alone.

• Do not apply more than the rated voltage between the terminals or between each terminal and earth ground.

• Limit operation to the specified measurement category, voltage, or amperage ratings.

• Use Product-approved measurement category (CAT), voltage, and amperage rated accessories (probes, test leads, and adapters) for all measurements.

• Measure a known voltage first to make sure that the Product operates correctly.

• Use the correct terminals, function, and range for measurements.

• Measure for hazardous voltage without the Low-Pass Filter.

• Do not use the Product if it operates incorrectly.

• Replace the battery when the low battery indicator shows to prevent incorrect measurements.

• Remove the batteries if the Product is not used for an extended period of time, or if stored in temperatures >50 °C. If the batteries are not removed, battery leakage can damage the Product.

• The battery door must be closed and locked before you operate the Product.

• Remove all probes, test leads, and accessories before the battery door is opened.

• Do not use the Product if it is damaged.

• Disable the Product if it is damaged.

Safety Specifications

Maximum Voltage Applied to any Terminal and Common.............. 1000 V

Fuse Protection
for mA Input................. 0.44 A, 1000 V, IR 10 kA

Frequency Overload Protection......................... <10^7 V-Hz

Battery ......................... Four AA batteries
(NEDA 15A or IEC LR6)

Operating Temperature ...... -20 °C to +55 °C (-4 °F to +131 °F)
Storage Temperature ........ -40 °C to +60 °C (-40 °F to +140 °F)

Relative Humidity ................. Noncondensing

Altitude
Operating...................... 2 000 m
Storage......................... 12 000 m

Safety
IEC 61010-1 .................. Pollution Degree 2
IEC 61010-2-033 ............ CAT IV 600 V / CAT III 1000 V

Wireless Radio with Adapter
Frequency Range........... 2402 MHz to 2480 MHz
Output Power .................. <10 mW

Electromagnetic Compatibility (EMC)
International............... IEC 61326-1-Portable Electromagnetic Environment; IEC 61326-2-2

CISPR 11: Group 1, Class A

Group 1: Equipment has intentionally generated and/or uses conductively-coupled radio frequency energy that is necessary for the internal function of the equipment itself.

Class A: Equipment is suitable for use in all establishments other than domestic and those directly connected to a low-voltage power supply network that supplies buildings used for domestic purposes. There may be potential difficulties in ensuring electromagnetic compatibility in other environments due to conducted and radiated disturbances.

Emissions that exceed the levels required by CISPR 11 can occur when the equipment is connected to a test object.
Korea (KCC)................... Class A Equipment (Industrial Broadcasting & Communication Equipment)

Class A: Equipment meets requirements for industrial electromagnetic wave equipment and the seller or user should take notice of it. This equipment is intended for use in business environments and not to be used in homes.

USA (FCC) ..................... 47 CFR 15 subpart B. This product is considered an exempt device per clause 15.103.

LIMITED WARRANTY AND LIMITATION OF LIABILITY

This Fluke product will be free from defects in material and workmanship for three years from the date of purchase. This warranty does not cover fuses, disposable batteries, or damage from accident, neglect, misuse, alteration, contamination, or abnormal conditions of operation or handling. Resellers are not authorized to extend any other warranty on Fluke’s behalf. To obtain service during the warranty period, contact your nearest Fluke authorized service center to obtain return authorization information, then send the product to that Service Center with a description of the problem.

THIS WARRANTY IS YOUR ONLY REMEDY. NO OTHER WARRANTIES, SUCH AS FITNESS FOR A PARTICULAR PURPOSE, ARE EXPRESSED OR IMPLIED. FLUKE IS NOT LIABLE FOR ANY SPECIAL, INDIRECT, INCIDENTAL OR CONSEQUENTIAL DAMAGES OR LOSSES, ARISING FROM ANY CAUSE OR THEORY. Since some states or countries do not allow the exclusion or limitation of an implied warranty or of incidental or consequential damages, this limitation of liability may not apply to you.
