**Fluke i2000 Flex AC Current Clamp**
The i2000 is an ac current probe utilizing the Rogowski principle. It can be used to measure currents up to 2000 A when used in conjunction with multimeters, oscilloscopes, recorders or data loggers. The flexible and lightweight measuring head allows quick and easy installation in hard-to-reach areas.
- Three ranges: 20 A, 200 A and 2000 A, 1 mV, 10 mV or 10 mV/A output
- Accuracy: ± 1 % of range (at 25 °C, 45 Hz to 65 Hz)
- Ideal for current measurement on thick and hard-to-reach conductors without breaking the circuit
- Max. conductor diameter 178 mm (7 in)
- BNC adapter included

**Fluke i310s AC/DC Current Clamp**
The i310s current clamp is based on Hall effect technology for use in measurement of both ac and dc current. The i310s may be used in conjunction with oscilloscopes and other suitable recording instruments for accurate non-intrusive current measurement.
- Current range: Dual ranges 30 A and 300 A ac rms or 45 A and 450 A dc
- Output sensitivity: 10 mV/A and 1 mV/A
- Accuracy (at +25 °C): ± 1 % of reading ± 50 mA (30 A range) or ± 300 mA (300 A range)
- Resolution: ± 50 mA and ± 100 mA
- Load impedance: > 10 kΩ
- i310s includes BNC connection and adapter to banana plug connection

**Fluke i3000s Flex AC Current Clamp**
The i3000s Flex is an ac current clamp utilizing the Rogowski principle. It can be used to measure currents up to 3000 A when used in conjunction with oscilloscopes, recorders or data loggers. The flexible and lightweight measuring head allows quick and easy installation in hard-to-reach areas.
- Three ranges: 30 A, 300 A and 3000 A, 1, 10 or 100 mV/A output
- Accuracy: ± 1 % of range (at 25 °C, 45 Hz to 65 Hz)
- Ideal for current measurement on thick and hard-to-reach conductors without breaking the circuit
- Max. conductor diameter 178 mm (7 in)
- Also available in a pack of four for use in power quality analyzers
- Available in 610 mm (24 in) or 914 mm (36 in) head length

**i50s AC/DC Current Probe**
The i50s current probe is based on patented hall effect technology for use in measurement of both ac and dc current. The i50s is a high bandwidth current probe ideal for low current measurement for use with oscilloscopes.
- Current range: Dual 3 A/30 A ranges
- Output sensitivity: 1 V/A, 100mV/A
- Accuracy: ± 0.5 % typical (dc to 100 Hz @ 25 °C)
- Bandwidth: DC to 50 MHz (-3 dB)
- Auto Degauss and Autozero functions
- Requires ± 12 V, 1.3 A external power supply, dedicated bench power supply module PSI50s is available.
- BNC output connection for oscilloscope
