3000 FC
Wireless Multimeter

Safety Information

3-Year Limited Warranty.
See the Users Manual for the full warranty.

Go to www.fluke.com to register your Product, read the Users Manual, and find more information.

A Warning identifies conditions and procedures that are dangerous to the user.

⚠️⚠️ Warnings
To prevent possible electrical shock, fire, or personal injury:

• Carefully read all instructions.
• Read all safety information before you use the Product.
• Do not alter the Product and use only as specified, or the protection supplied by the Product can be compromised.
• Limit operation to the specified measurement category, voltage, or amperage ratings.
• Do not use the Product around explosive gas, vapor, or in damp or wet environments.
• Do not touch voltages > 30 V ac rms, 42 V ac peak, or 60 V dc.
• Do not exceed the Measurement Category (CAT) rating of the lowest rated individual component of a Product, probe, or accessory.
• Measure a known voltage first to make sure that the Product operates correctly.
• Do not use the Product if it is altered or damaged.
• Disable the Product if it is damaged.
• Do not work alone.
• Comply with local and national safety codes. Use personal protective equipment (approved rubber gloves, face protection, and flame-resistant clothes) to prevent shock and arc blast injury where hazardous live conductors are exposed.
• Replace the batteries when the low battery indicator shows to prevent incorrect measurements.
• The battery door must be closed and locked before you operate the Product.
• Do not use the Product if it operates incorrectly.
• Examine the case before you use the Product. Look for cracks or missing plastic. Carefully look at the insulation around the terminals.
• Use only correct measurement category (CAT), voltage, and amperage rated probes, test leads, and adapters for the measurement.
• Do not use test leads if they are damaged. Examine the test leads for damaged insulation, exposed metal, or if the wear indicator shows. Check test lead continuity.
• Keep fingers behind the finger guards on the probes.
• Do not touch the probes to a voltage source when the test leads are connected to the current terminals.
• Connect the common test lead before the live test lead and remove the live test lead before the common test lead.
• Remove all probes, test leads, and accessories that are not necessary for the measurement.

Safety Specifications

Maximum Voltage between any Terminal and Earth Ground............. 1000 V

Frequency Overload Protection.......................... $\leq 10^7$ V-Hz

⚠️ Fuse Protection for mA inputs......................... 0.44 A, 1000 V, IR 10 kA

Temperature

Operating.......................... -10 °C to +50 °C

Storage........................... -40 °C to +60 °C
Battery ................................ AA Alkaline batteries, NEDA 15A IEC LR6 (x3)

Relative Humidity ............ 0 % to 90 % (0 °C to 35 °C)
  0 % to 75 % (35 °C to 40 °C)
  0 % to 45 % (40 °C to 50 °C)

Altitude
  Operating ...................... ≤2000 m
  Storage ....................... ≤12 000 m

Safety
  General......................... IEC 61010-1: Pollution Degree 2
  Measurement .................. IEC 61010-2-033: CAT IV 600 V / CAT III 1000 V

Electromagnetic Compatibility (EMC)
  International............... IEC 61326-1: Portable Electromagnetic Environment
  CISPR 11: Group 1, Class A,
  IEC 61326-2-2

  Group 1: Equipment has intentionally generated and/or uses conductively-coupled radio frequency energy that is necessary for the internal function of the equipment itself.
  Class A: Equipment is suitable for use in all establishments other than domestic and those directly connected to a low-voltage power supply network that supplies buildings used for domestic purposes. There may be potential difficulties in ensuring electromagnetic compatibility in other environments due to conducted and radiated disturbances.
  Caution: This equipment is not intended for use in residential environments and may not provide adequate protection to radio reception in such environments.
  Emissions that exceed the levels required by CISPR 11 can occur when the equipment is connected to a test object.

Korea (KCC)............... Class A Equipment (Industrial Broadcasting & Communication Equipment)

  Class A: Equipment meets requirements for industrial electromagnetic wave equipment and the seller or user should take notice of it. This equipment is intended for use in business environments and not to be used in homes.

USA (FCC) ............... 47 CFR 15 subpart B. This product is considered an exempt device per clause 15.103.Detailed Specifications

Wireless Radio
  Frequency Range......... 2405 MHz to 2480 MHz
  Output Power .............. <10 mW
