

How would you know if you had a \$1,000,000 opportunity in your facility?

Even lean organizations are finding they can reduce waste and energy expenditures by up to 30 % with an energy audit program. In just one audit each using Fluke kits, three companies identified over \$2,700,000 in savings.

A Fluke energy program gives actionable answers that will help you save money now, and in the future. Learn how you can quickly reduce fixed costs, continue innovating and stay competitive.

Fluke. Energy answers.

A program of
Fluke Corporation.

FLUKE®

Fluke. Energy Answers.

Designed to help companies like yours manage

We have designed a multi-step program to identify, change and sustain savings by correcting energy issues you might not even know you have.

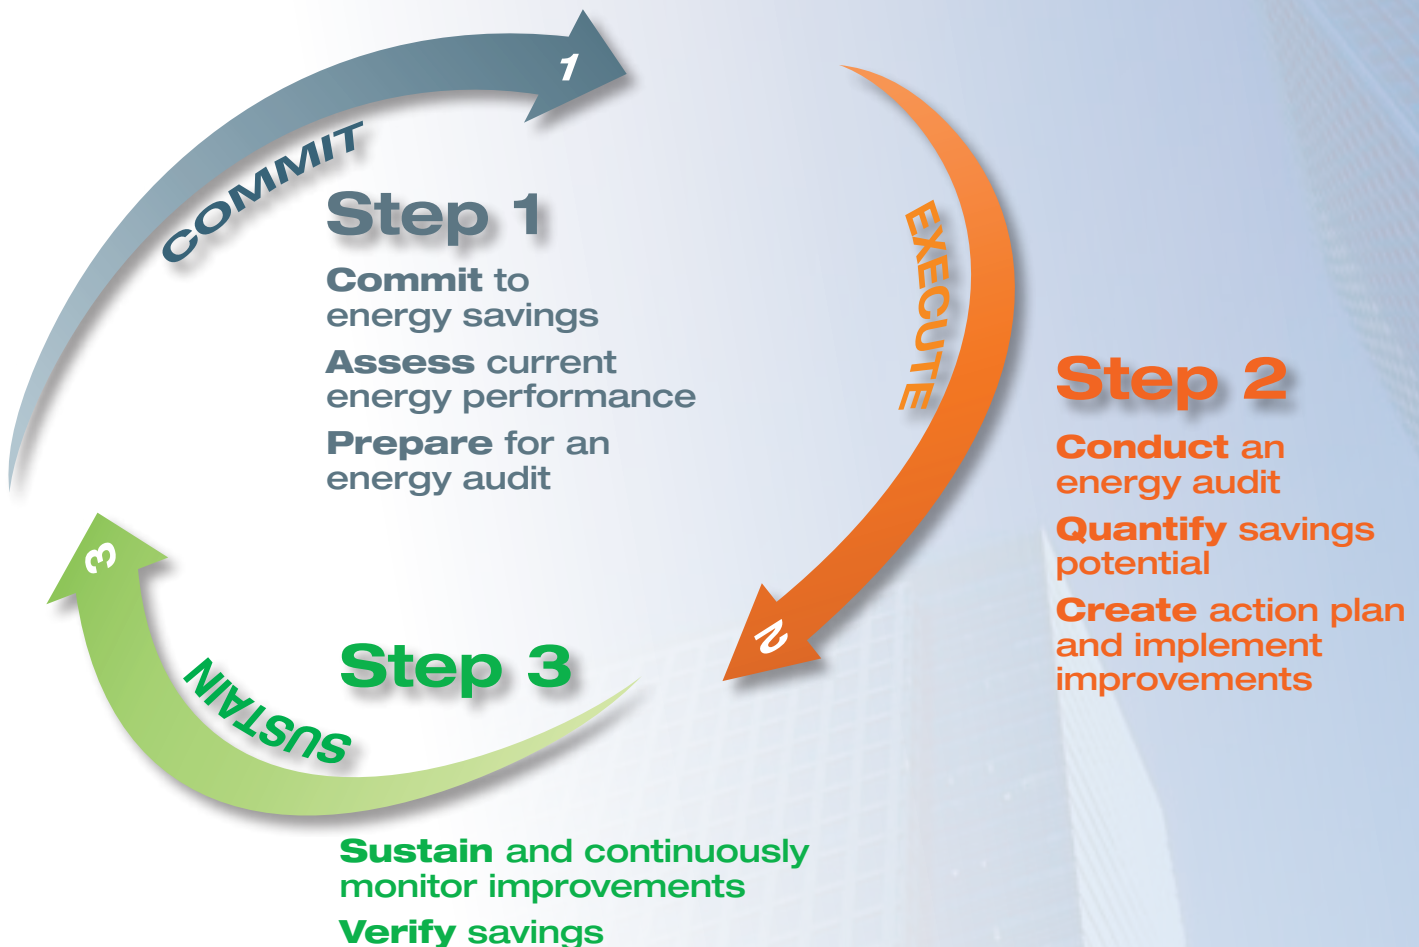

Why you need to do an energy audit.

Companies utilizing our tools and waste-finding process have been able to save 30 % of their annual operating expenses. Can you afford not to save?

Go to www.fluke.com/EnergyAnswers for more case studies showing exactly how much other companies saved and learn how you can do one in your facility.

Here is how the energy audit works:

The Fluke Energy Answers program guides you through all of the steps needed for a successful energy audit and sustainable results.

energy costs.
