

FLUKE 233 MARCH COMPETITION WINNER!

Competition Entry:

Being a manager of a large weather radar facility, there are often times I wished I could monitor the systems contained up on the massive moving antenna platform that is a major component of the radar. With a Fluke 233 Remote Display Multimeter I would at last be able to do measurements on the moving platform safely from below, (view Ken's working station below)

CONGRATULATIONS KEN! We are sure that with the 233 he will now be able to complete his measurements safely from the ground!

FLUKE 233 – Allowing you to be in two places at once!
