ii900/i910
Acoustic Imager

Safety Information

Go to www.fluke.com to find more information.
To view, print, or download the manual and the latest manual supplement, visit http://us.fluke.com/usen/support/manuals.

A Warning identifies conditions and procedures that are dangerous to the user. A Caution identifies conditions and procedures that can cause damage to the Product or the equipment under test.

⚠️ Warnings
To prevent possible fire or personal injury:
• Read all safety information before you use the Product.
• Carefully read all instructions.
• Do not alter the Product and use only as specified, or the protection supplied by the Product can be compromised.
• Do not use the Product if it operates incorrectly.
• Do not use the Product if it is altered or damaged.
• Disable the Product if it is damaged.
• Batteries contain hazardous chemicals that can cause burns or explode. If exposure to chemicals occurs, clean with water and get medical aid.
• Do not disassemble the battery.
• Remove the batteries if the Product is not used for an extended period of time, or if stored in temperatures above 35 °C. If the batteries are not removed, battery leakage can damage the Product.
• Use only Fluke approved power adapters to charge the battery.
• Do not short the battery terminals together.
• Do not disassemble or crush battery cells and battery packs.
• Do not keep cells or batteries in a container where the terminals can be shorted.
• Do not put battery cells and battery packs near heat or fire. Do not put in sunlight.
• Disconnect the battery charger and move the Product or battery to a cool, non-flammable location if the rechargeable battery becomes hot (>50 °C) during the charge period.
• Replace the rechargeable battery after 5 years of moderate use or 2 years of heavy use. Moderate use is defined as recharged twice a week. Heavy use is defined as discharged to cutoff and recharged daily.
• Repair the Product before use if the battery leaks.
• Have an approved technician repair the Product.

⚠️ Caution
Storage and/or continual operation of the Product in extreme ambient temperature conditions can result in temporary interruption of operation. If this occurs, let the Product stabilize (cool down or warm up) before you resume operation.
Safety Specifications

Power........................................ BP291/Li-ion, 10.8 V, 5000 mAh, 54 Wh

Temperature
  Operating
    ii900.............................. -10 °C to 45 °C
    ii910.............................. -10 °C to 40 °C
  Storage without battery ....... -20 °C to 70 °C
  Storage with battery .......... -20 °C to 60 °C
  Battery charging ................. 0 °C to 45 °C

Altitude
  Operating............................ 2000 m
  Storage................................ 12 000 m

Ingress Protection...................... IP40

General Safety ......................... IEC 61010-1

Electromagnetic Compatibility (EMC)
  International......................... IEC 61326-1: Portable
                                  Electromagnetic Environment
                                  IEC 61326-2-2
                                  CISPR 11: Group 1, Class A

Group 1: Equipment has intentionally generated and/or uses conductively-coupled radio frequency energy that is necessary for the internal function of the equipment itself.

Class A: Equipment is suitable for use in all establishments other than domestic and those directly connected to a low-voltage power supply network that supplies buildings used for domestic purposes. There may be potential difficulties in ensuring electromagnetic compatibility in other environments due to conducted and radiated disturbances.

Caution: This equipment is not intended for use in residential environments and may not provide adequate protection to radio reception in such environments.

Emissions that exceed the levels required by CISPR 11 can occur when the equipment is connected to a test object.

Korea (KCC)......................... Class A Equipment (Industrial
                                  Broadcasting & Communication
                                  Equipment)

Class A: Equipment meets requirements for industrial electromagnetic wave equipment and the seller or user should take notice of it. This equipment is intended for use in business environments and not to be used in homes.

USA (FCC)......................... 47 CFR 15 subpart B. This product is considered an exempt device per clause 15.103.
